## SUMMARY

---

A highly skilled Front-End Developer with 2 years of experience specializing in React.js and Next.js. Proficient in building dynamic, high-performance, and user-friendly web applications with a focus on clean, efficient, and scalable code. Experienced in modern front-end technologies including JavaScript (ES6+), TypeScript, Redux, Next.js, Tailwind CSS, and Bootstrap. Strong problem-solver who prioritizes crafting highly efficient, reusable, and maintainable code that enhances scalability and long-term project success.

## CORE COMPETENCIES

---

- **Building High-Performance Applications:** Optimizing performance by minimizing re-renders, using efficient state management, and implementing lazy loading, memoization, and code-splitting. Focused on ensuring optimal performance across client-side and server-side rendering (CSR & SSR) for seamless user experience.
- **React & Next.js Expertise:** Deep understanding of React and Next.js, utilizing their features to build scalable and maintainable applications. Skilled in SSR (Server-Side Rendering) and CSR (Client-Side Rendering) to ensure fast page loads and efficient resource handling.
- **Creating Reusable Components:** Designing modular, reusable, and well-structured React components to ensure scalability, maintainability, and consistency, leveraging hooks and context API for efficient data flow.
- **Clean Code Practices:** Prioritizing clarity, maintainability, and performance through proper naming conventions, modular architecture, effective documentation, and strict adherence to best practices for code optimization.
- **Problem Solving & Debugging:** Quickly identifying issues and implementing long-term solutions for performance bottlenecks, UI inconsistencies, or logic errors, ensuring a high-quality user experience and fast execution times.
- **State Management & Data Flow:** Managing state efficiently with tools like Redux, React Context, and Zustand, optimizing data flow to enhance application stability and responsiveness.
- **Responsive UI Development:** Creating visually appealing and responsive interfaces using CSS methodologies, Tailwind CSS, styled-components, and ensuring cross-device compatibility for seamless user interaction.

## EXPERIENCE

---

- **All Safe** 2023 - Present  
*Front-End Developer* *Software House & Cybersecurity Company*
  - **Key Responsibilities:** Build and enhance high-performance, responsive web applications using React.js. Develop projects from scratch and improve existing applications. Fix legacy code issues, enhance performance, and implement new features to match UI/UX designs. Integrate RESTful APIs and write efficient, reusable code following best practices.
  - **Leadership:** Led and mentored interns to boost their front-end development skills. Spearheaded transition from PHP Blade to React.js. Advocated for API usage for improved data management.
  - **Collaboration:** Worked with cross-functional teams including designers, back-end developers, and stakeholders to deliver high-quality products on time.
- **Freelance** 2023 - Present  
*Front-End Developer* *Independent Work*

## PROJECTS

---

- **My Portfolio** Modern Portfolio  
*Personal Web Showcase* *Built with Advanced Animations*
  - **Features:** A modern and highly interactive personal portfolio designed to showcase skills, projects, and personality through fluid animations and seamless transitions. Utilizes GSAP and Framer Motion to deliver a smooth, engaging user experience with performance in mind. Fully responsive and crafted with attention to micro-interactions and motion design.
  - **Tech Stack:** Next.js, Typescript, Tailwind CSS, Framer Motion, GSAP
- **Tradenes** Cryptocurrency Platform Website  
*Freelance Project* *Informational / Corporate Web Application*

- **Features:** Redesigned a multi-page cryptocurrency website including landing, exchange overview, coin tracking, pricing, and contact pages. Focused on modern UI/UX, responsiveness, and improved user flow.
- **Tech Stack:** Html, Css, Bootstrap, Javascript

### • Power Signal

*Freelance Project*

Cryptocurrency Platform Website

*Web Application (Dashboard + Public Site)*

- **Features:** Redesigned a full cryptocurrency trading platform with dashboard and public website. Improved UI/UX, ensured responsive layout, and enhanced user experience across all sections.
- **Tech Stack:** PHP (Laravel), HTML, CSS, JavaScript, Bootstrap, custom UI components.

### • Makram Stores

*All Safe Project*

E-commerce Platform

*Plumbing & Sanitary Products*

- **Features:** Product comparison system, advanced search and filtering, order tracking, comprehensive user profile system, shopping cart functionality, and optimized UI/UX.
- **Tech Stack:** React.js, Axios, Redux Toolkit, Tailwind CSS, Material UI, React Router with lazy loading, code splitting, and reusable components.

### • Prudle Institute

*Complete Learning System*

Language Learning Platform

*Student & Teacher Dashboards*

- **Features:** Full-featured English learning platform including public website, student and teacher dashboards, placement test engine, level-based course subscriptions, lesson progress tracking, teacher file/video uploads with student access, and interactive UI elements.
- **Tech Stack:** React.js, Tailwind CSS, React Query, Shadcn UI

### • Follix

*All Safe Project*

Trading Platform

*Real-time Market Analytics & User Dashboard*

- **Features:** Real-time market data, dynamic user dashboard, chatbot for live assistance, interactive animations using Framer Motion, seamless order execution, and intuitive user experience.
- **Tech Stack:** React.js, Framer Motion, WebSocket for real-time data, Tailwind CSS, Axios, and react query

### • Rasef

*All Safe Project*

Infrastructure Management System

*Web Application (Road Paving Operations)*

- **Features:** A road paving management system tailored for Saudi Arabia. Handles project tracking, status updates, location mapping, and workflow coordination between contractors, engineers, and authorities.
- **Tech Stack:** Html, Css, Bootstrap, Javascript

### • Elyana

*All Safe Project*

Green Tech / Recycling Platform

*Service-based Web Application*

- **Features:** Waste collection scheduling system, dual authentication (for homeowners and store owners), location-based driver dispatch, earnings tracking for both users and drivers, request history, real-time driver updates, and clean user-friendly interface. The platform facilitates seamless communication between homeowners, drivers, and recycling factories with transparent monetary rewards based on waste weight or type.
- **Tech Stack:** React.js, Redux Toolkit, Tailwind CSS, Formik for form management and validation, Axios for API communication, React Router with lazy loading and protected routes, role-based access control, and reusable component architecture for scalable UI.

### • Alqada

*Freelance Project*

Visual Search Platform

*Image-Based Web Application*

- **Features:** A Pinterest-like image discovery platform where users can search for any topic and instantly view related images. Includes dynamic search, image grid display, and smooth UI transitions.
- **Tech Stack:** React.js, Tailwind CSS, Axios (for image API integration), React Router, responsive grid layout, reusable components, Redux toolkit.

### • All Safe SA

*All Safe Project*

Company Profile Website

*Saudi Arabian Branch*

- **Features:** Detailed service showcase, portfolio section with sleek animations, modern GSAP animations, fully responsive design, and optimized performance.
- **Tech Stack:** React.js, GSAP, Tailwind CSS, React Router with lazy loading and code splitting.

- Kimi** Course & Lesson Platform  
*All Safe Project* Educational Content
  - Features:** Course browsing and subscription, interactive lesson and video player, blog section, and smooth GSAP animations.
  - Tech Stack:** React.js, GSAP, Tailwind CSS, React Router, custom video player.
- Eslam Saad** Fashion Designer Website  
*All Safe Project* Custom Suits & Clothing
  - Features:** Gallery of suits and clothing with detailed descriptions and prices, online orders for bespoke clothing, fully responsive design, and engaging on-page animations powered by GSAP to enhance browsing experience and reflect the elegance of the designs.
  - Tech Stack:** React.js, Axios, Redux Toolkit, Tailwind CSS, Material UI, React Router with lazy loading, code splitting, and reusable components for a clean and efficient codebase.
- Amigos Dashboard** Restaurant Coupon Platform  
*All Safe Project* Food Service Management
  - Features:** QR code scanning, full application control, merchant dashboard, admin dashboard, and secure privacy controls.
  - Tech Stack:** React.js, Redux, Axios, Tailwind CSS, React Router with QR code scanning integration.

## EDUCATION

---

- Route Academy** Front-End Development  
*Front-End Diploma* Key Projects Completed
  - Projects:** Yummy (food recipe app), Weather App, Smart Login, Quote App, Bookmarker, Mealify, DevFolio, and Daniels.
- Helwan University** Faculty of Commerce  
*Bachelor's Degree* 2020 - 2024

## TECHNICAL SKILLS

---

- Languages & Frameworks:** JavaScript, TypeScript, HTML, CSS, Sass, React.js, Next.js
- State Management:** Redux Toolkit, Context API
- Libraries & Tools:** Axios, Material UI, Bootstrap, Tailwind CSS, GSAP, React Query, Framer Motion, shadcn/ui
- APIs & Integration:** Webhooks, tRPC, drizzle-ORM, Supabase, REST API, Postman
- Build & Package Management:** NPM, Webpack, Vite, Babel, Docker
- Version Control:** Git, GitHub
- Performance & Optimization:** Lazy Loading, Code Splitting, Virtualization
- Design & UI Development:** Responsive Design, UI Libraries, Figma to Code, Accessibility (A11Y), CSS Modules, Styled Components

## LANGUAGES

---

- Arabic:** Native
- English:** Proficient
